The AGFEO DECT-S0-Base starts the registration mode, please register the headset as described in the manual of the headset.

AGFEO Systemheadset 9120

Systemheadset 9120 Configuration in TK Suite

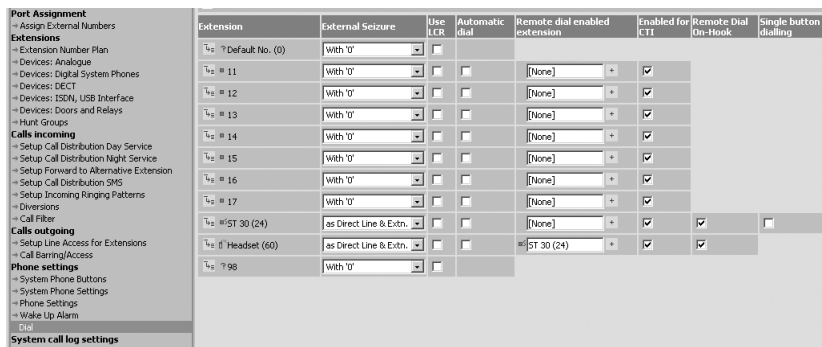

After registering the Headset to the PABX System, read out the system configuration via TK Suite Set. In the section "Extensions / Devices:DECT" you will find the new extension (headset) registered.

Ensure that incoming calls are set the same as for your telephone. This will ensure that your headset will ring at the same time as your phone and that calls can be answered directly from your headset.

If you also activate remote dial and CTI for your headset, then you will be able to dial for your headset by using a system phone.
